Measures of infection and relapse in M. mulatta infected with P. cynomolgi B strain

* Note that while TP4 for Rlc14 is officially classified as a relapsing time point, consumers should be aware that these samples were collected at a time when the distinction between relapse and inter-relapse was subject to clinical interpretation and may be considered as having been collected during relapse resolution.

* TP7 is the “Final” sample collection for all NHPs. See the idealized figure for details.

E04		<u>Baseline</u> <u>(Pre-infection)</u>	<u>Acute infection</u>	<u>Post-Peak</u>	<u>Inter-relapse</u>	<u>Relapse</u>
	RFa14	TP1	TP2	TP3	TP4, TP5, TP6	TP7
	RMe14	TP1	TP2	TP3	TP4, TP5, TP7	TP6
	Rlc14	TP1	TP2	TP3	TP5, TP7	TP4, TP6
	RSb14	TP1	TP2	TP3	TP5, TP7	TP4, TP6
	RFv13	TP1	TP2	TP3	N/A	N/A
